

LED Multichannel Searching Light

LED-008E Multichannel

Easy taken light product for on-the-spot investigation,so as to fit for criminal spy demand, use the most advanced single wavelength light source, can last 3hrs by normal dry cell, it can display visible wavelength to UV wavelength which are selective light for search. Main use for searching, the dactylogram and footprint searching left at scene;detect the body fluid, poison, pesticide, explosive residual and Censorship, it is the fantastic lighting facility of criminal technicians.

LED-008E Multichannel LED Searching Light

Purple Output Wavelength: 401~405nm

Blue Output Wavelength: 450~480nm

White Output Wavelength: 420~680nm

Green Output Wavelength: 500~550nm

Red Output Wavelength: 615~635nm

30cm Work Distance Illuminating Intensity: 300LM

30cm Work Distance Facula Diameter: 18CM

30cm Work Distance Facula Uniformity: Over 85%

Power: 1W

Run Time: 3hrs

Bulbs Lifetime: 20000hrs

Battery Type: Li-ion

Run Voltage: 3.7V

Dimensions: 140 x35x 35mm

Weight: 190g
